

Annexure – II

Adopted tasks from the EEFI Young Workers' Sub-committee meeting

1. The Industrial company level meetings:

We've to organize Industrial Union Level Young Workers' meetings. These meetings will discuss the specific issues of the industries and the young workers in the broad context linking with the ongoing neoliberal policy-regime.

At least, one meeting of each union should be organised by the month of October 2025. The participants will be nominated by district units. A report should be prepared from these meetings and submitted to the Young-Workers sub-committee of EEFI.

2. AGIT-PROP: To use modern tools to expose capitalist exploitation among the young workers, to propagate the fact that capitalism has no solution to today's problems and no future to offer and to build a powerful working-class movement for socialism.

To agitate the workers on the immediate injustices and pain caused by capitalism. To organise them for bigger struggle towards transformation.

Linking the issues with the policies and the politics behind that, mobilise the young workers towards the transformative politics

- **Exposing Capitalism with Data:** We'll show how the bosses get rich by exploiting workers. We'll highlight low wages, debts, deteriorating health, high living costs in urban, precarious jobs, and environmental destruction – proving these are systemic, not accidental.
- **Smashing False Ideas:** We'll attack the lies told by the ruling class – like "work hard, get rich" – that hide the true nature of exploitation. We'll fight false consciousness.
- **Spreading the Calls to Action:** We'll tell people about the importance of unionisation, to join ongoing strikes, express their dissent through various forms of protests, and local struggles, building worker solidarity.

3. Education: Dialectical Methods of Education will be followed for

- a) Educating leading Cadres**
- b) Educating the mass of industrial young workers**
- c) Publication**

Building the New World: Provide a clear understanding of existing society and shows the path to a socialist future and calls for actions to achieve that. In order to carry forward above tasks, the company/industry level meetings have to plan, in consultation with the concerned state committees/Federations/Unions, concrete initiatives of:

- 1) Educating our leading cadres on the issues already mentioned above, to facilitate focussed educative campaign among the mass of the industrial young workers on the urgency of their more active participation/involvement in the collective actions/activities of the workers from the trade union platform,
- 2) trade union level intervention on the issues/demands/problems being faced by the young workers in the concerned industry/sector,
- 3) focussed initiative of involving young workers in the team of leading activists at different tiers of union leadership etc.

The process of industrial company level and state level meeting and convention of young workers/activists should commence at the earliest from today onwards to take up and carry forward above tasks.
